

Collaborate 2 Innovate

Send your collaborative project idea to us now.

The New Zealand IT Cluster working in partnership with the Ministry of Health, is pleased to announce a new opportunity for Health sector organisations to turn their ideas for innovation into practice via our Collaborate 2 Innovate initiative.

The Cluster is calling on all members and other interested parties to submit ideas about initiatives that will ultimately provide improvements to the way we deliver health services, and provide the potential for companies to develop new intellectual property and exploit new markets.

To enter, organisations are invited to complete a high level definition of their project idea, outlining the current problem and how they propose to help solve it. To get started, download a copy of the Concept Ideas template from our website www.healthit.org.nz/c2i today. Entries close on

20 November 2008.

The Cluster will assist you to develop your ideas, find partners from within the provider and vendor communities, provide you with exposure to key decision makers in the Ministry of Health and other sector organisations, and help you to develop the business case that will form the foundation for future development and investment.

The Cluster will announce which entries have been prioritised for further development at our AGM on **27th November 2008.**
