

The New Zealand Health IT Cluster

MICROSOFT COMMON USER INTERFACE SEMINAR

Friday 17th August 2007

This Technology Seminar convened by the Cluster is intended to give you an overview of the NHS common user interface programme, and its relevance to health IT systems internationally.

Forum Outline:

The Microsoft Health Common User Interface (CUI) provides Design Guidance and controls which allow a new generation of safer, more usable and compelling health applications to be quickly and easily created. The CUI has just been launched at www.mscai.com

Come and hear Gabe Rijpma (Healthcare and Human Services Director, Microsoft Asia Pacific) present and demonstrate the CUI.

Seminar Programme:

- “Microsoft Common User Interface” Gabe Rijpma

ABOUT THE PRESENTERS

Gabe Rijpma

Gabe Rijpma is the Healthcare and Human Services Director for Microsoft Asia Pacific, working from Singapore. Gabe's responsibilities include

- Leading and defining the solution offerings and strategy for meeting the needs of health and human services customers.
- Collaborating with governments and industry partners to deliver solutions that help health and human services organizations transform the way they do business
- Work with governments to build and foster a local software economy by building out the capabilities of independent software vendors and systems implementers that focus on the healthcare business

Prior to his current role at Microsoft he spent two year at Microsoft headquarters in Redmond, WA United States as an Enterprise Solutions Architect focused on working with customers around the world on designing and building systems to meet their needs utilising services oriented architecture.

Gabe started his career at Microsoft in 2000 and joined as a Principal Technology Specialist focused on helping government customers realize the value from their Microsoft technology investments.

Prior to joining Microsoft he was the Principal Consultant at Software Spectrum Inc in Sydney Australia in the business solutions development practice.
